

London Veterinary Surgical Referrals: An alternative in-house option, convenient for you and your clients

James Creasey

After graduating from Bristol Veterinary School in 2003 I joined the PDSA as a veterinary surgeon with a surgical bias. To improve my surgical technique, I spent one day a week observing surgery at the RVC for 2 years. I passed my certificate in Small Animal Surgery in 2009. I moved to Bow PDSA as Head Veterinary Surgeon where I managed a 9-vet team, a branch and the 24-hour emergency service. In 2010 I moved to Village Vets where

I acted as Group Head of Surgery. In 2013 I started to offer peripatetic surgical referrals in London. I now cover over 80 veterinary practices across London, Essex, Hertfordshire, Surrey, Suffolk and Kent. There has been a rapid growth in enquiries, so I am adding to my team and looking to expand further.

James

As a highly experienced surgeon based in Essex, I aim to offer a professional and caring in-house alternative to external referrals. Providing the best service for you and your patients will be a priority, offering flexibility and convenience that meets the needs of your clients. As part of the package offered to your surgery I would provide a personal service encouraging you to discuss cases with me on a one to one basis. I would also like to provide the opportunity for any member of your team who is interested in advancing their surgical skills to scrub in and I will happily advise on surgical techniques. Finally, I am passionate that a surgeon's job doesn't just stop after performing the surgery. Post-operative care is equally important, and I will provide a tailored post-operative plan which suits the needs of each individual patient. By using London Veterinary Surgical Referrals, your practice will be able to offer an alternative to external referrals that will provide the utmost in convenience and service for your client strengthening that all important client bond with your practice.

Testimonials

"James has been doing surgical cases in my clinic for some 3-4 years. James is punctual, efficient and highly personable. I would recommend his services to any practice that wants to keep high value surgery within the practice."

Dr John Hankinson, Director - John Hankinson Veterinary Clinic, London

"Andre was the only vet who had the confidence to do the Teca-Total ear canal ablation on our dog Raffaella, which was totally successful... we cannot thank you enough and have total confidence in you taking care of our animals".

Mr and Mrs Hart and Raffaella

"Apart from his obvious skill perhaps the most important point here is the lack of drama around a visit from James, he is booked with ease, is very approachable and is so efficient that he ties up my operating theatre and nurses for a minimum of time causing minimal disruption to my normal working day".

Stuart De Wolf, Director - Hitchin Veterinary Surgery, Hertfordshire

Andre Costa Pereira

Andre graduated in 2011 and after 2 years in Portugal came to the UK. He enjoys all aspects of soft tissue and orthopaedics, but has a special interest in minimally invasive surgery, BOAS (brachycephalic obstructive airway syndrome) and traumatology. He has a certificate in Advanced Veterinary Surgery and is an advanced practitioner in small animal surgery.

"For me, being a veterinary surgeon is not just a profession, it is an honour, and an obligation to provide the best level of care to our four legged friends."

London Veterinary Services
